

Case Studies

CLIENT ➤ Aston Martin
SECTOR ➤ Automotive
SERVICE ➤ Industrial Resin Flooring
FINISH ➤ Industrial

PROJECT

Polydeck were employed to provide flooring solutions for the servicing workshops at Aston Martin, Newport Pagnell.

The existing substrate had many problems, which included cracked and spalling joints, uneven stepped concrete slabs and 50 years of various floor finishes.

CHALLENGE

The challenge was to provide a flat, smooth and decorative floor finish which could cope with the rigours of a very active service/repair centre and to eliminate the need to reproduce live expansion and concrete day joints within the new finish.

SOLUTION

An area of 3500m² was scabbled to remove old finishes. A resin layer was applied with a 10mm comfort floor flexible polyurethane resin finish.

The finished product provides a bright working environment for workers and customers alike, which is easy to clean and can withstand the rigours of a very busy service centre.
